

OCTODASH — DAY ONE GUIDE

Simple language · No experience needed · For everyone on day one

WHAT IS THIS TOOL?

Octodash is a **list of companies**. Each one shows what they buy from Microsoft and GitHub.
Your job: read the info → decide what to sell. That's it. Nothing more.

ASK THESE 5 QUESTIONS BEFORE YOU CALL

#	Question	You are looking for...
1	Do they have GitHub ?	The word GHE
2	Do they have Security ?	The word GHAS
3	Do they have Copilot (AI) ?	The word Copilot
4	Do they use Azure DevOps ?	The word ADO
5	Is their contract ending soon ?	EA End Date — less than 6 months

AFTER YOUR 5 ANSWERS — PICK ONE BOX

Motion	When you see this...	Sell this	Say this to the customer
LAND Sell GITHUB	GHE = NO	GitHub Enterprise	"You need <i>GitHub</i> first. We add it to your Azure agreement."
SECURE Sell SECURITY	GHE = YES GHAS = NO	GitHub Adv. Security	"Your code is not fully protected. We fix that without changing your tools."
ACCELERATE Sell AI	GHE = YES Copilot = NO	GitHub Copilot (AI)	"Your developers can write code 2x faster with AI. Let me show you."

NUMBERS THAT MATTER

Word	Simple meaning
MACC	How much they spend on Microsoft cloud
ACR	How much they are ACTUALLY using right now
ARR	How much they already pay GitHub
EA End Date	When their contract ends
Big MACC + Low ARR	= BIG opportunity for you!

WHEN TO CALL

EA End Date	What to do
Less than 3 months	CALL TODAY. URGENT.
3 to 6 months	Call this week.
More than 6 months	Send an email. No rush.

WHAT TO SAY ON THE CALL — COPY THIS EXACT TEXT

"You are using Azure DevOps today. You do **NOT** need to stop using it.
GitHub works **WITH** Azure DevOps. You get AI tools (Copilot) and better security.
No big change. Just better tools on top."

3 RULES BEFORE YOU CALL

Rule 1: Check **Account Team** in Octodash. Call them **BEFORE** the customer. Never go alone.

Rule 2: Check **Pipeline**. If a deal is already open, do **NOT** open a new one. Talk to the team.

Rule 3: See Accenture / Avanade / EPAM / Cognizant on the account? Include them. They are partners.

IF YOU ARE STUCK

I don't know what to sell

Go back to the 5 questions above.

They use TFVC (not Git)

Hard to sell. Move to next account.

They say "we don't need it"

Say: You don't replace ADO. You **ADD** GitHub.

I don't know who to call

Look at Account Team in Octodash.

Octodash

New Joiner & EBR Guide

Step-by-step guide to reading the GTM dashboard, classifying accounts, and arriving at every EBR ready — not just to pull numbers.

STEP-BY-STEP: YOUR FIRST ACCOUNT REVIEW IN OCTODASH

#	METRIC	WHAT TO LOOK FOR
1	Open Octodash	aka.ms/octodash — filter to your territory
2	Revenue Motion	Land / Secure / Accelerate — pre-computed. Start here, fastest lens.
3	GHE	Yes → skip Land, move to Secure or Accelerate. No → Land motion.
4	GHAS & GHazDO	GHE + no GHAS = Secure. ADO + no GHazDO = Secure. Both = Accelerate.
5	Copilot	Seats + adoption %. Installed ≠ Adopted. No Copilot = Accelerate.
6	EA End Date	Renewal in 0–90 days = TOP PRIORITY. This is your change window.
7	MACC & ACR	High = cloud-active + exec sponsorship. Strong signal.
8	ARR	Low/zero on large account = whitespace = big opportunity.
9	Account Team	AE, CSM, Specialist. Align BEFORE outreach. Never go solo.
10	Pipeline	Check GitHub + MSX for open opps — avoid duplicates.
11	Partner	Accenture / Avanade / Eficode / Xebia / EPAM / Cognizant? Loop them in.
12	Set your motion	Land / Secure / Accelerate / Migration / Expansion. Ready to call.

MOTION CLASSIFIER — THE 5-QUESTION FRAMEWORK

MOTION	SIGNAL	ACTION
LAND	No GHE or expired	Sell GitHub Enterprise
SECURE	GHE + no GHAS ADO + no GHazDO	Sell GHAS / GHazDO
ACCELERATE	GHE + no Copilot (or low adoption)	Sell GitHub Copilot
MIGRATION	ADO customer + partner attached	Move repos → then expand
EXPANSION	GHE + Copilot, growing team	Grow seats / attach GHAS

GREEN & RED FLAGS

PRIORITISE — Green Flags	SLOW DOWN — Red Flags
✓ ADO Services (cloud, not on-prem)	✗ TFVC (not Git — hard to migrate)
✓ Existing Copilot or GitHub usage	✗ Extremely large repositories
✓ Security / shift-left initiatives	✗ Massive Git objects
✓ Platform engineering / DevEx focus	✗ No cloud strategy
✓ "AI transformation" language	✗ No dev-productivity focus
✓ EA or GitHub renewal within 90 days	✗ No account team / no open pipeline

ABBREVIATION DICTIONARY — WHAT EVERYTHING MEANS

Grouped by category so terms build on each other. Learn Products first, then Commercial.

PRODUCTS — WHAT THE CUSTOMER HAS (OR DOESN'T)

ABBREV	FULL NAME	WHAT IT MEANS TO YOU AS A SELLER
GHE	GitHub Enterprise	The main product. If Yes → skip Land, go to Secure or Accelerate.
GHAS	GitHub Advanced Security	Code scanning & secret protection. GHE + no GHAS = Secure motion.
GHAzDO	GHAS for Azure DevOps	Security inside ADO. ADO + no GHAzDO = Secure. Migration later.
Copilot	GitHub Copilot	AI coding assistant. Installed ≠ Adopted. No Copilot = Accelerate.
ADO	Azure DevOps	Microsoft's dev platform. ADO-only accounts = migration opportunity.
TFVC	Team Foundation VC	Old VCS, not Git. Hard to migrate = red flag.

COMMERCIAL SIGNALS — MONEY & CONTRACT FIELDS

ABBREV	FULL NAME	WHAT IT MEANS TO YOU AS A SELLER
TPID	Top Parent ID	Master account ID — maps all subsidiaries. Look at the full family.
EA	Enterprise Agreement	Multi-year Microsoft contract. Best place to attach GitHub & Copilot.
MCA	Microsoft Customer Agreement	Modern contract type. Determines how GitHub is procured.
CSP	Cloud Solution Provider	Sold via a reseller. Affects procurement route.
MACC	Azure Consumption Commitment	Committed Azure spend. Large = exec sponsorship + transformation signal.
ACR	Azure Consumed Revenue	Actual Azure spend. High = active engineering, great GitHub prospect.
ARR	Annual Recurring Revenue	GitHub revenue on account. Low/zero on big account = opportunity.

PEOPLE & PROCESS — WHO TO TALK TO, WHERE TO CHECK

ABBREV	FULL NAME	WHAT IT MEANS TO YOU AS A SELLER
AE	Account Executive	GitHub sales rep who owns the account. Align first — always.
CSM	Customer Success Manager	Post-sale health. Key partner for Copilot adoption & expansion.
SI	System Integrator	Tech partner (Accenture, Avanade...). Loop in on migrations.
MSX	Microsoft Sales Experience	Microsoft's CRM. Check for open opps before you start a pursuit.
EBR	Executive Business Review	Strategic review with customer execs. Use Octodash data to prep.

PoC	Proof of Concept	Trial run of a feature. Useful for Accelerate & Migration motions.
-----	------------------	--

REGIONS & SALES TERMS		
ABBREV	FULL NAME	WHAT IT MEANS TO YOU AS A SELLER
NEMEA	North, East, Middle East & Africa	Your sales region.
GTM	Go To Market	Overall strategy — how we bring a product to customers.
DevEx	Developer Experience	How devs feel about their tools. A key pain point to unlock.
SKU	Stock Keeping Unit	Product package (e.g. GHE + GHAS = two SKUs in one deal).

THE 30-SECOND TALK TRACK — MEMORISE THIS

"Most Azure DevOps customers aren't looking to replace Azure DevOps — they're preparing for AI-powered software development. Microsoft's own guidance is that GitHub is where Copilot, agents and AI workflows are evolving fastest. The good news: no big-bang migration. Most start by moving repositories to GitHub while continuing to use Azure Boards and Pipelines — unlocking the latest AI while preserving existing investments."

RESOURCES — BOOKMARK THESE ON DAY ONE

NAME	LINK / WHERE	USE FOR
Octodash URL	aka.ms/octodash	Your daily starting point
Announcements	Teams → Octodash Team Channel	Updates, new features, outages
Feedback Form	OCTODASH Feedback Form	Report issues / suggest improvements
Email Support	OCTODASH Email Support	Access issues or data questions
Training	OCTODASH Training & Tutorials	Self-serve learning — start here
Work Items Board	github.com/orgs/github/projects/20551/views/3	See what the team is shipping
Issue Template	github.com/github/sales-analytics/issues	Log data bugs or feature requests
